Product Description

It has independent heating zones that are controlled through a microprocessor. It has a large storage tank, the tank incorporates the filter which ensures continuos flow of paraffin from the tank. The flow of paraffin from the tank can be controlled manually or through foot switch. The heated operation platform and the forceps holder makes it easy to embed the tissues. The unit has a storage tank, preservation boxes, forceps holder, Paraffin nozzle whose Heating can be controlled through microprocessor and it can be programmed for the weekdays for both ON and OFF. Salient Features \bullet Large paraffin tank suitable for high throughput lab \bullet Illuminated Work Platform \bullet Easy to read and operate control panel \bullet Optional Cold Spot \bullet Mold warmer and cassette bath \bullet It is programmable for weekdays and each heating zones temperature can be individually set which makes it easy for the user \bullet Separate heating zones for storage tank, 2 preservation boxes, paraffin from different heating zones

in-built memory to store the set temperature. The bath is made up of corrosion resistance material to provides the required durability. Technical Specifications \bullet Water Temperature Range: ambient to 99 Deg C \bullet Overall Dimensions (mm) : $320x320x110 \bullet$ Water Bath Dimensions,inner (mm) : $238x180 \bullet$ Power : 200VA Supplied complete with the power cord.

TISSUE FLOTATION BATH (ANALOG)

This circular floatation bath is ideally suited for preparing of distortion less and wrinkle free tissue specimens. It is a double walled unit with inside made up of aluminum and outside MS sheet which is duly painted. Technical Specifications • Water Temperature Range : ambient to 80 Deg C • Bath Surface Dia (mm): 245mm • Bath Volume (Inch) : 10x5 Supplied complete with indicators,cord and plug and a suitable to work on 220/230V-AC Supply Read More

Product Description

is microprocessor controlled, incorporates a feather touch keyboard with a LCD display for setting up temperature of water bath and the hot plates. The temperature is controlled with the help of precise temperature controller. It also has a built in memory to store the set temperature. The water bath is made up of corrosion material which provides the required durability. Technical Specifications ● Water Temperature Range: ambient to 100 Deg C ● Integrated Hot Plates: Yes ● Water Bath Dimensions,inner (mm) : 258x193x64 ● Hot Plate Dimensions (mm): 110x70,140x70 ● Integrated LED for Bath illumination: Yes ● Overall Dimensions (mm): 370x440x140

Product Description

It is suitable for use in small laboratories. It has a strudy stand and is supplied complete with thermostatically controlled wax bath and two one litre beakers.

WAX TRIMMER

Is used to remove the excess wax from the embedding cassettes by scraping it over a grooved and heated surface prior to sectioning and has an waste tray attached to collect the excess wax .
